

AQUALIS Acquires Full Circle Environmental Services, LLC

Acquisition represents AQUALIS' first add-on since partnering with Fusion Capital Partners and strengthens the platform's Southeast presence and service line breadth.

MORRISVILLE, NC – October 1, 2026 – [AQUALIS](#), the nation's premier provider of sustainable water engineering, compliance and management for stormwater, wastewater and drinking water systems, announced today the acquisition of [Full Circle Environmental Services, LLC](#).

Headquartered in Garner, N.C., Full Circle Environmental, formerly known as Full Circle Septic, provides septic tank services ranging from installation to maintenance, repair and inspection as well as emergency response since 2017. Servicing both commercial properties and residential homeowners' associations, Full Circle has built a loyal customer base and a strong reputation for responsive, high-quality service, with deep expertise navigating North Carolina compliance requirements.

"Full Circle Septic's customer-oriented approach aligns with AQUALIS's purpose to provide sustainable water compliance and management solutions for the betterment of our nation's communities and corporations," says AQUALIS Chief Development Officer, Erin Grenz. "This acquisition strengthens AQUALIS's presence in North Carolina through the addition of septic capabilities as we move to enter the HOA market as well as further service our existing portfolio by providing a more complete, full-lifecycle solution for their water infrastructure needs."

"We are excited to join AQUALIS in their mission to inspire change by preserving and protecting our most precious natural resource: water," says Zach Woody, founder of Full Circle Septic. "Joining a national platform gives our employees new opportunities to grow and gives our customers access to a broader range of services, all while keeping the same local, hands-on approach we've always provided. We're proud to bring our team's expertise to AQUALIS and excited for what's ahead."

About AQUALIS
